Brand New Control System Dual Control Soft Serve Machine

DW138ETC

- Next generation control system regulates product viscosity with great precision and consistency.
- Hopper refrigeration keeps mix fresh without frosting on hopper wall.
- Overnight mode preserves mix freshness and maintains product texture.
- Separate control of the two cylinders allows running two different products smoothly at the same time.
- Built-in anti-overfreeze mechanism.
- Gear pump optional.
- Spigot height compliant with ADA requirement.
